DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claims 1-18 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest a bit line pre-charge circuit for a semiconductor memory device. In particular, a bit line pre-charge circuit comprises a first and a second transistors connected in series between a pair of bit lines; and a third transistor connected between the pair of bit lines and having a gate receiving a pre-charge control signal as an input for equalizing voltage levels of the pair of bit lines, wherein the first and second transistors have channel lengths longer than that of the third transistor, so that the first and second transistors have resistances higher than that of the third transistor.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference cited in the form PTO-892 disclose bit line pre-

charge circuits for reducing leakage current due to short circuit between a word line and a pair of complementary bit lines.
